

T60 (F60)

The F60's unique U-line backrest is molded in a single piece which provides the shoulder region with a 3D comfort through increased torsion and flexibility whilst offering effective support in the lumbar region. The front of the plastic shell is shaped in such a way which permits the cushion to work freely thus preventing pressure points and allowing it to adapt to the body's movements. The F60 offers a variety of options to suit all the ergonomic requirements of good task seating.

Standard Features

- Soft foam and fabric
- U-Shape backrest shell
- Lumbar support with adjustable height
